

The EEP Award Jury 2006
has the honour to announce the winner of the Award

GOLD 2006

Technologie Ekologiczne, Poland

For their innovative environmental technology

T-Technology®: Recycling Technology with the use of the method of catalytic processing of plastics waste into liquid fuels component

The purpose of this EEP Award is to recognise the efforts of European companies that are improving the environment with their innovative environmental technologies.

The EEP Award, an annual prize, is organised by the European Environmental Press (EEP), the association of environmental magazines in Europe, with support of the EFAEP (European Federation of Associations of Environmental Professionals), in collaboration with Pollutec, the leading annual French environmental trade show.

The Jury selecting your innovation to be awarded from more than 75 entries, consisted of journalists of leading environmental European magazines and representatives of the EFAEP.
